EXPERIENCE

Georgia State University

User Services Technician (Promoted)

Oct 2024 – Present

Atlanta, GA

- Delivered direct technical support to students, diagnosing and resolving hardware, software, and network connectivity issues across campus.
- Managed and optimized the room reservation system, significantly reducing scheduling conflicts and improving overall user experience.
- Promoted to assist in hiring and onboarding new student employees, conducting candidate evaluations and training 7 new hires on departmental procedures.

PROJECTS

Stitch Vault

Full-Stack Developer

2024

Atlanta, GA

- Architected and deployed a full-stack CRM application for small business owners in the tailoring industry using Python, JavaScript, HTML, CSS, and SQL.
- Integrated the ChatGPT API to automate customer communication, improving record-keeping and reducing manual data entry.
- Designed a responsive front-end with clean UI/UX patterns to ensure ease of use for non-technical clients.

Rapha's Counselling Center

Web Developer

2024

Atlanta, GA

- Designed and launched a client-facing booking website using the Wix API, HTML, CSS, and JavaScript, enabling seamless online scheduling of therapy sessions.
- Built and tested interactive user flows and wireframes; reduced appointment booking friction and improved platform accessibility.
