EDUCATION

Georgia State University Bachelor of Science, Information Technology GPA: 3.2 • Relevant Coursework: Computer Security, IT Project Management, Data Structures	Expected Dec 2027 Atlanta, GA
H. Lavity Stoutt Community College Associate of Science, Computer Science Certificate, Business Administration	2021 – 2024 British Virgin Islands

EXPERIENCE

Georgia State University Library User Services Technician • Resolve 8–20 ServiceNow tickets weekly across hardware, software, network, and D2L Brightspace issues. • Run front-desk service, equipment lending inventory, and inter-campus loans in Ex Libris Alma. • Test new systems before campus rollout and write how-to guides used to train staff and support patrons. • Promoted to hiring: review resumes, interview candidates, and trained 7 new student employees.	Oct 2024 – Present Atlanta, GA
Freelance Web Developer Client Projects • Built Stitch Vault, a client-management app for tailoring businesses (JavaScript, Python, SQL, OpenAI API). • Launched a Wix booking site for Rapha's Counseling Center so clients schedule therapy sessions online. • Managed scoping, invoicing, and budgets directly with clients across multiple engagements.	2024 – Present Remote

PROJECTS

Kaizen — Personal AI Agent Claude API, Gmail, Outlook, Google Calendar, GroupMe, SMS Self-hosted • Built a self-hosted Claude agent that drafts email and text replies, schedules events, and generates invoices. • Saves ~7 hours per week and answers emails and texts 80% faster than handling them manually. • Designed a human-in-the-loop safeguard: every outgoing message and action requires explicit approval before it is sent.	2026
TimeSync — Workforce Scheduling Platform Next.js, TypeScript, Node.js, Python, FastAPI, PostgreSQL, Claude API Vercel • Developing a shift-scheduling platform that builds schedules using Google OR-Tools constraint optimization. • Integrated a Claude copilot for schedule generation, coverage gaps, and labor-cost analysis.	2026
Mentora — Micro-Mentoring Mobile App React Native, Expo, TypeScript, Appwrite • Built a mobile app where mentees post questions by text, audio, or video and answers build a searchable knowledge base. • Scripted Appwrite database provisioning and a serverless function that alerts mentors to new questions.	2026
